ABSTRACT

The consortium of the European universities consisting of Parma University (Italy), Zhitomir Institute of Engineering & Technology (Ukraine), Gent University (Belgium) and Technical University of Mittweida (Germany) have developed the Joint European Project “Environmental Sciences in Relation to the Implication of Radiation in Healthcare”. In 1998 this Project had gained the grant of European Union under the Tempus-Tacis Programme (Project’s duration – 3 years: 1999-2001, financing – ECU496000). In this report the main goals and tasks of this project are examined.
