### **ABSTRACT**

The scope of this paper is the proposal of wastewater reuse quality criteria, appropriate for Greece. It is well known that there is a great variation of wastewater reuse quality criteria applied, mainly related to significant differences in socioeconomic conditions, environmental policies, available water resources. In this work the parameters that affect the wastewater reuse criteria in Greece are evaluated, concerning among others reuse priorities, available treatment plants and effluent characteristics and recommendations are made for developing future guidelines or regulations for Greece in relation to reuse practices (agricultural, urban, etc).

### **KEYWORDS**

Wastewater reuse, Greece, guidelines, criteria, wastewater treatment
